

Webinar! High QA Solutions: One Connected Platform for Manufacturing Quality

Quality control shouldn't mean endless manual inspection work. Join our exclusive webinar as we show you how to break free from long hours of manual data entry into streamlined digital workflows. Discover how to eliminate manual steps and connect your inspection data directly to final reporting effortlessly.

Date	Wednesday, 19 August 2026
Time	10:30 AM to 11:30 AM (GMT+8)
Location	Via Teams <i>Link will be provided upon registration.</i>
Our speaker	 Aaron Meng General Manager Agiletech (Tianjin) Engineering Management Co., Ltd
Topics	High QA Inspection Manager This demonstration showcases a digital connected quality management process that automates inspection planning and First Article Inspection (FAI) reporting. Key topics include automated drawing ballooning, digital inspection planning, automatic data collection, FAI report generation, PPAP package management, and digital documents workflow and approval process – all connected in a shared database. Users report up to 80% faster inspection planning and up to 5 times First Article Inspection (FAI) reporting. HQA Connect for PolyWorks® Streamlines manufacturing inspection by accelerating CMM program creation up to 5x and enabling direct, error-free data transfer from 2D drawings to 3D metrology.
Why Should You Attend - See a live demonstration of how to eliminate tedious manual drawing ballooning and move directly into automated, digital inspection planning. - Learn how to instantly transition from your drawings to completed First Article Inspection (FAI) reporting and streamlined PPAP package management. - Discover how the HQA Connect for PolyWorks bridges the gap between 2D drawings and 3D metrology, eliminates manual data entry and supports a complete quality process, including automatic GD&T extraction, real-time SPC monitoring, and rapid FAI reporting. - Connect with our team of experts and High QA specialist, ask technical questions, and get tailored advice for your manufacturing challenges.

About Our Invited Guest Speaker

Aaron Meng is the General Manager of Agiletech (Tianjin) Engineering Management Co., Ltd. and represents High QA in China and Southeast Asia. He has extensive experience in supplier quality management, supply chain development, new product introduction, and manufacturing digitalisation. Aaron previously served as Asia-Pacific Supplier Quality Manager for GE Power (Alstom), Kiewit, and SPX Thermal. He also gained extensive experience in supply chain management and NPI projects with John Deere and AGCO, following earlier career experience with GE Medical and Motorola. Today, he focuses on helping manufacturers digitalise inspection planning and quality data management through High QA Inspection Manager, including automated balloon drawings, digital inspection plans, FAI and PPAP reporting, SPC, and quality data analytics. Aaron holds a Master's degree in Business Analytics from Rochester Institute of Technology.
