Lunch & Technical Materials provided		
Request a live demo measurement with your own part in different day		

## X-ray for Electronic Part Inspection with Phoenix Radiography Systems

From smartphones and computers to electric cars and airplanes, solder joints, semiconductor packages and electrical components are vital to so many of our most important devices. Waygate Technologies brings high resolution 2D X-ray and 3D Computed Tomography (CT) inspection solutions right to the electronics production line and the research and development lab to ensure the safety and integrity of components.

Join us in this seminar where our speakers will share with you the new important updates on Radiography and CT Inspection.

Limited slots only. Maximum of 2 representatives per company. Register now.
