

Enhance Quality Assurance; Improve Product Quality

Cassel Metal Detectors for the Food Industry

Date	Tuesday, 29 March 2022
Time	4:00PM – 5:00PM (GMT+8 – SG / MY Time) 3:00PM – 4:00PM (GMT+7 – JKT time)
Venue	Via ZOOM
Invited Speaker	Gianfranco Rubini EMEA Commercial Leader <i>CASSEL Messtechnik GmbH</i>
Topics	• Food Safety Standards & Compliance for Foreign Body Detection • Detection and Elimination of physical contaminants in: ❖ Bulk products – Gravity or Conveyor ❖ In Liquid ❖ In Meat ❖ Pharmaceuticals ❖ Glass jars and bottles - Glass in Glass (GIG) applications
Why you should attend	• Learn about different food safety standards and compliance • Understand how to select the right inspection systems to fully support your quality assurance policy
Program includes	Digital handouts (To be emailed post event.)

Registration

* Registration will end by 25 March 2022. Please register [here](#) or email sales@cairnhill.com with your details.

Enhance Quality Assurance; Improve Product Quality

Cassel Metal Detectors for the Food Industry

How can Metal Detection enhance your quality assurance?

- Incoming goods inspection reduces defect costs and evaluates suppliers through early detection
- Final goods inspection ensures customers receive metal-free products as much as technically feasible
- Process control by safeguarding production facilities from being damaged by metal parts, reducing machine and plant downtime, and in turn improving the consistency of product quality and production volume
- HACCP – Determines Critical Control Point (CCP) in the production chain to reduce and prevent hazards that cause unacceptable risk to health

It is imperative to ensure that products detected as containing metal are not inadvertently reused or delivered to customers. Thus, it is critical to fully understand how to specify, select, and use product inspection systems to fully support your quality assurance policy and in turn, your customers.

Cairnhill Metrology welcomes you to join us as we invite **Gianfranco Rubini** (EMEA Commercial Leader from CASSEL Messtechnik GmbH) to share how CASSEL systems provide machine and product protection for many industries such as food, pharmaceutical, non-woven, plastics, forestry and mining. CASSEL systems are specially adapted to the requirements of the respective industry sector – for the best possible foreign object inspection.

Our CASSEL inspection demo system is also available for live demonstration by appointment at our Malaysia (JB) Metrology Applications Centres or via video conferencing.

About our Speaker

Gianfranco Rubini started his career with CASSEL Messtechnik GmbH in 2020 in the role of European Commercial Leader. He brings along 35 years of experience in product inspection solutions such as checkweighers, metal detectors and X-Ray inspection systems. Prior to joining CASSEL, Gianfranco held various management roles for more than 20 years in Thermo Fisher Scientific.
