Registration

* *Registration will end by 16 September 2022 or earlier when the seats are filled up.*

** *Please RSVP [here](#) or email sales@cairnhill.com with your details.*

Reliable and Traceable Portable Metrology

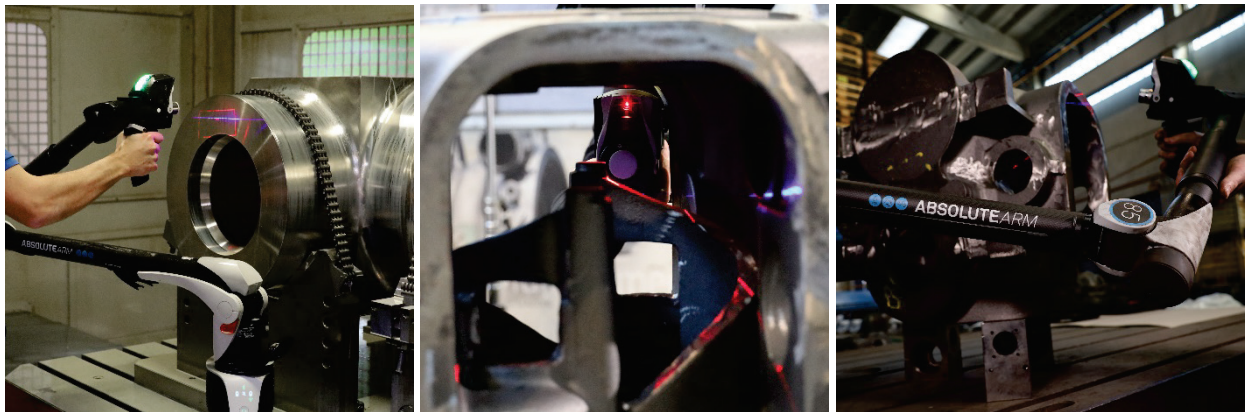

Now You Can Measure Anywhere!

Get ready for the most robust measurement arm ever produced with full IP54 protection! Together with the excellent portability and versatility of the **Hexagon Absolute Arm**, then IP54 protection rating together with increased maximum operating temperature makes it perfect for challenging and dusty environments where metrology-grade inspection is increasing in many countries.

Cairnhill Metrology welcomes you to our first physical seminar in Philippines since the Covid pandemic, supported by *Hexagon*. We are excited to invite you live on-site our new office and Metrology Applications Centre to learn more about the latest ground-breaking solutions for your non-contact 3D inspection needs!

We welcome **Farouk Ashraf Ismail**, *Regional Product Manager at Hexagon* to share how the Hexagon Absolute Arm can work together with Hexagon's **Laser Trackers** and **Structured Light Systems** and also our *Regional Applications Manager Ng Shyh Yu* to demonstrate how **InnovMetric PolyWorks** can be used together with Hexagon Portable Solutions to Measure Anywhere!

Our demo systems are also available for separate live demonstration sessions after the event. For existing portable arm users, our **Hexagon Accredited** and **ISO IEC 17025** certified calibration labs in the region can perform full calibrations, verification and preventive maintenance on your systems.

About our Speakers

With 26 years of experience in Metrology, **Farouk Ashraf Ismail** joined Hexagon in 2018. He brings with him a wealth of experience, having handled various metrology solutions such as CMMs, Profile Profilers, Portable CMMs, Laser Trackers, Structured Light Scanners, Optical Measuring Machines, etc.

With a background in Electronics and Electrical Engineering, **Ng Shyh Yu** joined Cairnhill Metrology over 20 years ago. In addition to his current role as Regional Applications Manager, Shyh Yu is also the Team Head for the Portable Solutions division within the company.
